DNS Setup for kamitcloud.ca

Follow the instructions below to configure SPF & DKIM records for this domain. We highly recommend that you do this to ensure your messages are delivered correctly and quickly.

Check my records are correct   Back to domain list

SPF Record

You need to add a TXT record at the apex/root of your domain (@) with the following content. If you already send mail from another service, you may just need to add **include:spf.tanglednetwork.com** to your existing record.

v=spf1 a mx include:spf.tanglednetwork.com ~all

DKIM Record

You need to add a new TXT record with the name **postal-RJJaoh._domainkey** with the following content.

v=DKIM1; t=s; h=sha256;
p=MIGfMA0GCSqGSIb3DQEBAQUAA4GNADCBiQKBgQC/u9MXnzj9kyS3L0AgrG+NRHy
MmPRsKF0DErrf0IOL9CIy40z8iZ65Ry2dAxEzbGC1sD8l71t+lqzpHE5J8L9XvPxSBGryVPSC
iWzl03I7zCulS+xbBERja0l7Pq0yduTwf3AkV0WpLnI1LlDnZOJI4SgKZW1K3vlJANaiD8ZKh
wIDAQAB;

Return Path

This is optional but we recommend adding this to improve deliverability. You should add a **CNAME** record at **psrp.kamitcloud.ca** to point to the hostname below.

rp.mail.tanglednetwork.com

MX Records

If you wish to receive incoming e-mail for this domain, you need to add the following MX records to the domain. You don't have to do this and we'll only tell you if they're set up or not. Both records should be priority **10**.

mx.mail.tanglednetwork.com
